My profile

I'm Reinis, a passionate and detail-oriented recent Multimedia Design graduate from UCN with a strong affinity for UX/UI design. At 22 years old, I'm eager to embark on a career where creativity and user-centric solutions meet. I'm obsessed with crafting pixel-perfect designs that not only look amazing but also make life easier for users. Whether it's an app, website, or anything in between, I'm up for the challenge.

Relevant work experience

UX/UI Design internship

JOIN ApS • Jan 2023 - Apr 2023 • Aalborg, Denmark

Frelance User Interface Designer

Jan 2018 - Aug 2021 • Remote, Latvia

During my freelancing journey, I tackled a diverse range of UI projects, including web applications, dashboards, websites, mobile apps, and more. In this experience I gained:

- **Independence and Time Management:** I developed the ability to work independently, effectively managing tasks and schedules.
- **Client communication:** I sharpened my communication skills by engaging with clients throughout projects, presenting and justifying design concepts
- **Feedback proficiency:** I embraced both positive and constructive feedback, using it to refine my work and ensure client satisfaction.
- **Adaptability:** My freelancing career demanded swift adaptation to new projects, showcasing my versatility.

Graphic designer

GoExanimo, Contract • 2020 - Jul 2021 • Remote, Latvia

Collaborate effectively with the team, integrating valuable feedback into the design process. Worked under tight deadlines and high-pressure situations, consistently delivering outstanding results.

A great aspect of my experience was the creation of compelling graphics for eSports-related events. Some highlights include:

- **LG OLED Fifa Baltic Cup:** I had the opportunity to enhance the digital presence of this prestigious event by designing the tournament logo as well as stream overlays, that reached the audience of more than 2500 people amongst Baltic countries.
- **LMT Latvian e-Basketball League tournament** I played a pivotal role in creating eye-catching advertisement banners and tournament bracket designs, contributing to the success and visibility of this eSports competition.

UX/UI Designer

Aston Baltic, Contract • Sep 2020 - Dec 2020 • Remote, Latvia

My primary responsibilities involved taking charge of an existing project, where I had to redesign existing pages and design new ones for an equipment rental platform. Initially, diving into an ongoing project presented challenges, but I swiftly adapted and successfully delivered a satisfying result for both the client and users.

- Throughout the process, I initiated on new functionalities as well as contributed to presenting multiple design improvements to the stakeholders.
- Designed dynamic views for the equipment rental platform and developed comprehensive style guides to seamlessly transform the design from high-fidelity prototypes to a developed platform.
- Consistently refined the design based on feedback received during review sessions.

Relevant education

University College of Northern Denmark

Multimedia design • Aug 2021 - Aug 2023 • Aalborg, Denmark

During the two year AP-degree studies, I had the opportunity to share the passion for design by working on diverse projects and learning about UX/UI together with other international students.

- Gained the ability to develop a project starting from scratch. Carried out qualitative user research and analysis, designed low and high fidelity designs as well as conducted user tests.
- As a part of practice based learning approach, I continuously worked in groups with other students, where we solved problems for clients in need of digital solutions, while constantly reflecting on work and choices regarding the selection of theories and methods.

Vecumnieki County school of music and art

Professional orientation in art • Sep 2011 - Jul 2020

Relevant courses

Learn HTML & CSS Course

Codecademy • 2020

Personal & professional competencies

I am ambitious, passionate and creative UX/UI designer with the ability to work both independently and in cross-disciplinary teams. My previous experience and education strengthens my knowledge and ability in designing user centric, pixel-perfect designs, low-fidelity wireframes, carrying out ux research in different project phases as well as conducting variety of user tests.

- **I am proficient in these design tools:** Figma, Sketch, Adobe suite, Microsoft Office
- **I have had previous experience working with:** InvisionApp, Zeplin, FigJam

I highly value constructive feedback. I am pro-active and enjoy to initiate new ideas. My fellow classmates and colleagues characterize me as down-to-earth, which helps me to keep calm and work well under pressure and tight deadlines.
